

Education evaluation – Bachelor in ArT & Technology

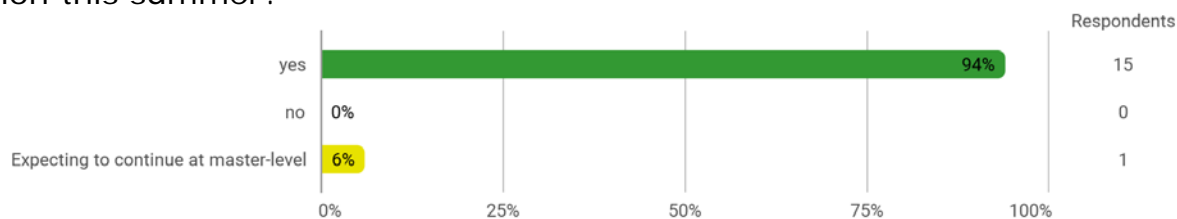

Sent to: 16

Answered by: 14

Overall Status

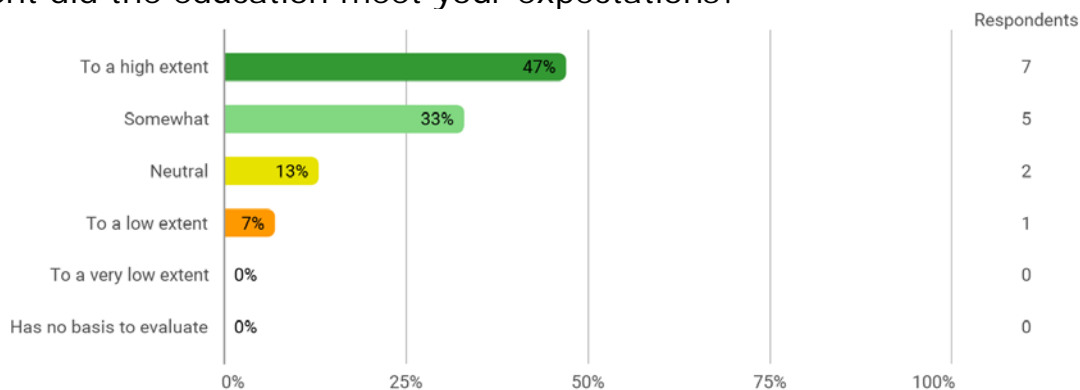

Do you expect to complete the education/have you already completed the education this summer?

Why do you not expect to complete your education this summer?

- Break

To what extent did the education meet your expectations?

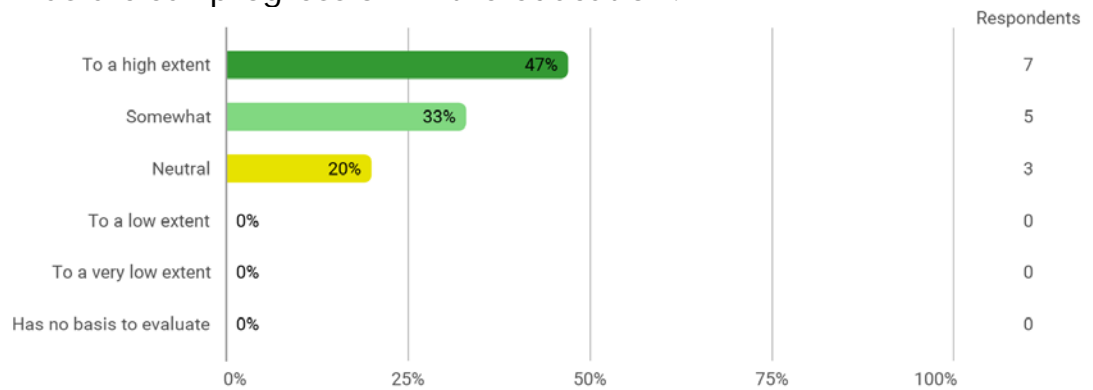

Further comments regarding your expectations for the education?

- I found the engagement of my peers to be lacking
- there wasn't a lot of information about what exactly is the bachelor about when I was applying, so I cannot tell to what extent my expectations were met
- Unfortunately, it was too broad and very different in semester levels (not consistent). For example, 1st - 3rd Semester was easy, while the 5th one was more difficult than the 6th semester. The levels were jumping - as a result - not clear what to expect.

- I expected to be taught more practical skills in the fields of programming, electronics, construction and digital fabrication methods. I would also have liked an semester about data visualization instead of two semesters about public art.

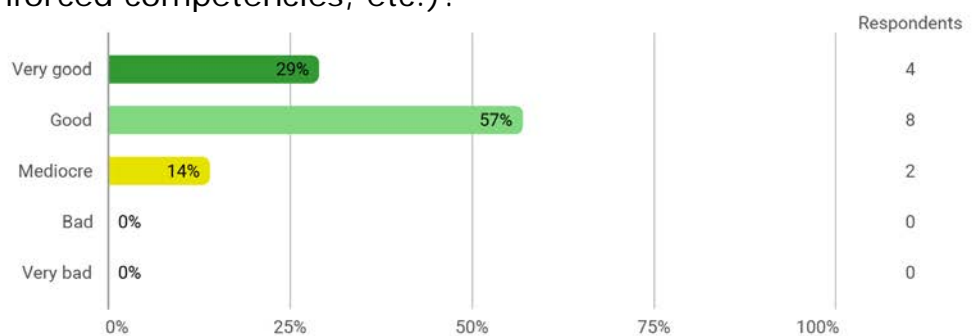

To what extent do you assess that the modules/courses were in continuation so that there was a clear progression in the education?

Further comments regarding progression in the education?

- there should be more clear organisation of the semestral programmes/courses. there was no point to have art based research in fifth semester for instance.

How has your academic benefit from the entire education been (eg in terms of knowledge, new reinforced competencies, etc.)?

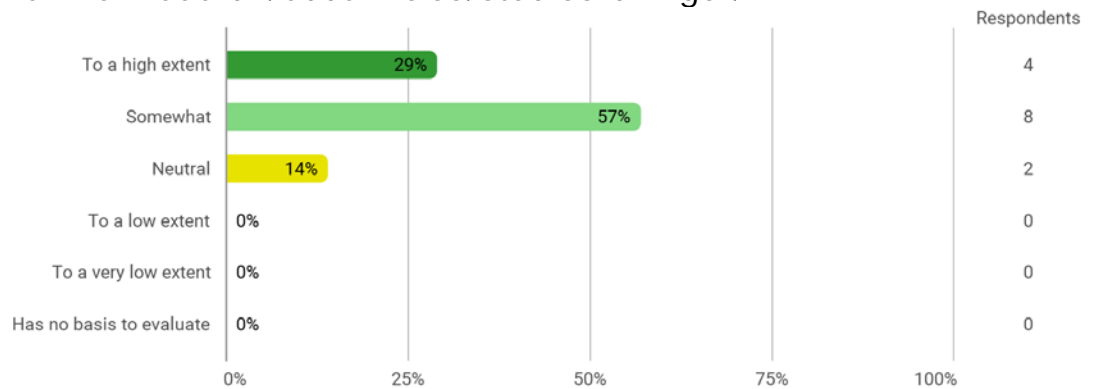

Further comments regarding your academic benefit from the entire education?

- Illustrator and Photoshop were missing from the programme.
- Sometimes the difficulty could be higher.

To what extent was the study organized so that you could meet the learning objectives of your education (competence profile)?

If needed look up the educations study regulation:
